

Process to Obtain a Street Address for Your Lot

Campbell County has changed the process to obtain a street address for lots in the county. Under the old process, you just called the local 911 office and told them your lot number and they would assign you a street address. Under the new procedures implemented last year, you must have a driveway location marked and then you call the local 911 office and they will send out a truck with GPS equipment in it and park it in front of your marked driveway and use that to assign a street address. When you are ready to do this, the phone number for the 911 office is 423-562-8095. Ask for Margret Cross who works from 8 to 4 weekdays and who is responsible to get this done.

We recommend that as soon as you have some plans ready and if you are going to be personally involved in any clearing activity or work on your lot that you put in a couple of stakes across the section of your lot where the driveway is planned, put some yellow caution tape between these stakes with a note stating "Driveway", and call them to get your street number assignment. By doing this, if you ever need emergency response while on your lot, when you dial 911, emergency personnel will know exactly where you are and it will greatly reduce the response time. It also gives you the street address you will need for insurance or loan purposes.
